

Data-informed Solutions, Delivered by People Who Know Your Business

Don't leave something as vital as data analysis to just anyone — GlobalTranz has the resources and expertise to cut through the complexity of data analysis and deliver real results. Plus, with GlobalTranz TMS, you'll gain access to real-time reporting and analytics at the push of a button.

Reporting

Utilize fully customized reporting capabilities that create visibility and generate insights, including:

- Full library of standard reports
- Carrier KPI reports
- Customized ad-hoc reports
- Business intelligence reporting
- Data analysis for optimization events
- Operational metric reporting
- Industry/customer-specific metrics that impact COGS

Predictive Analysis

Accurately reporting data on shipments that have already transpired is essential but forecasting trends and providing insights that drive real-time business decisions drive true competitive advantage.

- Load to truck forecasting
- Length of haul analysis
- Lead time analysis
- Detention time analysis

Transport Analysis

Using data from your previous and current shipments, GlobalTranz conducts a thorough transportation analysis and identifies opportunities to:

- Optimize your network
- Consolidate shipments
- Reduce total costs
- Identify areas for improvement
- Adjust strategies as your business grows

Why partner with GlobalTranz for your business analytics?

As a 3PL of choice, GlobalTranz strives to work alongside you to craft meaningful and impactful solutions for your business. With our team of dedicated experts and our innovative technological solutions like GlobalTranz TMS, managing and analyzing your data has never been easier.
